

Founded over thirty years ago, Perenco is an independent hydrocarbon producer involved in the entire lifecycle of projects, from exploration to decommissioning. Gross production is approximately 500,000 BOEPD. The group's strength lies in the technical ingenuity and versatility of its more than 8,500 strong team, who deliver safe and environmentally aware solutions to oil and gas fields around the world. By enhancing and developing local resources, Perenco is proud to support economic growth and social development wherever it works. Perenco operates in 12 partner countries and is based in the United Kingdom.

If you are currently in your second or third year of Engineering studies and you would like to become an expert in the Upstream sector, Perenco is offering you an excellent opportunity to achieve your ambitions. For more than 15 years, we have been cultivating a privileged collaboration with the IFP School which offers sponsored programs and apprenticeship.

This initiative is particularly for the students of the following programs:

- Énergie et Procédés (ENEP)
- Petroleum and Engineering Project (PEPD)

Our objective is clear: after your course at the IFP school, we wish to integrate you into our teams in one of our producing countries or in our Paris or London offices.

We are seeking people who are keenly interested in our jobs; people who are flexible, curious, and ready to have a fulfilling experience in a dynamic and constantly evolving company.

If you are interested in a sponsorship, please contact: sophie.mouton@perenco.com
